

CAMPAIGN DOCUMENT

PASSENGER FACILITIES

SLUG is campaigning for improvements to the general ambience and passenger comfort facilities at Stourbridge line stations. It is concerned that many platforms provide little cover for passengers in inclement conditions.

SLUG is deeply concerned at the lack of integrated bus services serving local stations. It also believes that travel information available on stations and trains needs major improvement. It is campaigning for local geographical and related public transport information to be displayed prominently at all Stourbridge line stations, and for posters to be displayed on all Class 172 trains showing basic onward travel information for all stations served by Snow Hill line trains.

SLUG is also campaigning for more comprehensive timetable booklets to be produced in place of the West Midlands Railway pocket timetables.
